INCREASE PRODUCTIVITY

The new VacuCobra has been specifically designed for lifting boxed goods up to 35kg...

QUICKLY

Rotate without limits

Rotate the goods (not the lift unit) to achieve the highest possible precision. A bottom swivel and an angle adapter ensures full freedom of motion when gripping the load.

Adjustable grip

The fingertip controls can be adjusted from the right to left side of the handle in seconds. The quick-release function makes sure that no time is wasted when releasing the load.

Lift from the side

The suction cup will secure the goods safely from the side as well as from the top.

Suspension

A lightweight aluminium jib crane provides safe, smooth and versatile operation.
